Don't Let Your

IT

*IntelliSyn
simplifies
the design,
deployment, and
management
of advanced,
secure, desktop-
to-cloud business
communications
networks.*

An efficient IT infrastructure allows you to compete more effectively, makes your employees more efficient, streamlines communications with your partners and suppliers, and improves interactions with your customers. If your network goes down, productivity and profits come to a screeching halt.

But keeping pace with technological change is difficult. And creating, deploying, maintaining, and managing an efficient and secure IT infrastructure often requires dedicated resources. This not only increases operating expenses but makes many organizations feel like they are being held hostage by their IT requirements.

With IntelliSyn, you'll never be hostage to your IT.

Simplify IT Design, Maintenance, and Management

IntelliSyn simplifies the design, deployment, and management of advanced, secure, desktop-to-cloud business communications networks. It offers a complete portfolio of IT solutions and services customized to your business needs, wherever your business takes you:

- **Custom IT networks** optimized to fit the unique needs of each business environment
- **Information security systems** designed to protect your desktop-to-cloud network
- **Internet telephony** solutions engineered to provide reliable, cost-effective voice service and easy-to-use unified communications and collaboration at every desktop on internet phones and networked PCs
- **Mobile office** solutions that provide all users with secure anywhere, anytime, any device access to business information and communication services
- **Cloud networking** solutions that leverage the latest cloud technologies and architectures to provide the right balance of on-premises and virtual networking
- **Cloud sharing** solutions that provide better performance and more control over file syncing and sharing compared to competitive cloud storage offerings
- **All-in-one turnkey systems** that provide a complete, end-to-end, hassle-free business communications network in a box

With IntelliSyn's complete portfolio of business communications solutions, you can harness the full power of the most advanced hardware, software, network security systems, and cloud options, and eliminate the risks associated with IT infrastructure investments.

IntelliSyn also offers desktop-to-cloud network design and installation for

Hold You Hostage

a variety of hardware and associated software from industry-leading suppliers. And IntelliSyn can assume full responsibility for the ongoing maintenance and management of all network components in most installations.

Improve IT Performance, Reliability, and Security

IntelliSyn's business communications solutions are designed to ensure you have the highest level of network availability possible. They improve the performance, reliability, and security of an advanced IT infrastructure and reduce downtime that can negatively impact your business. Most importantly, they improve productivity and performance by maintaining the flow of business-critical information.

To ensure your infrastructure is always operating at peak efficiency, IntelliSyn offers Service Level Agreements (SLAs) for all services, including those provided by its network of distributors, agents, and vendors. These SLAs contain all licensing and contract information, support procedures, as well as escalation and contact information. This complete service approach allows IntelliSyn to deliver maintenance services tailored to the unique needs of your organization. IntelliSyn desktop-to-cloud solutions are also engineered to protect the integrity and security of information. They enable your organization to manage transactions, ensure confidentiality, and control access to business-critical

information shared by employees with partners, suppliers, and customers.

Lower the Cost of IT

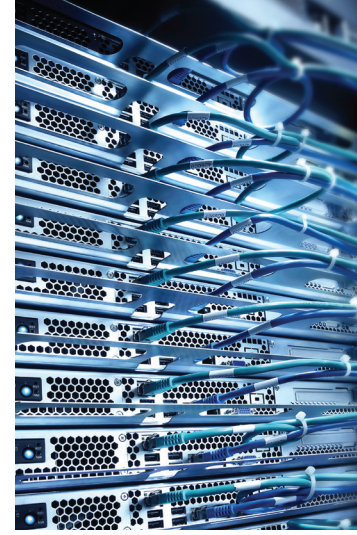

IntelliSyn's end-to-end approach makes business communications infrastructures simpler, more efficient, and less costly.

As your virtual IT department, IntelliSyn works as an extension of your organization. This allows you to offload IT infrastructure development and management so you can focus on the needs of your customers rather than on your infrastructure. It also gives you the benefits of having a fully staffed IT department at a fraction of the cost.

Power Your Business for Growth

All IntelliSyn managed IT solutions are designed to evolve with your organization. And they are backed by a complete portfolio of IntelliSyn services that allow you to deploy for today and easily scale for tomorrow:

- **IntelliSupport** provides customized, end-to-end IT infrastructure management from network consulting to complete help desk technical support for desktop systems, physical networks, virtual networks, and all the elements in between, such as servers, routers, switches, and wireless access points.

*IntelliSyn gives
you the benefits of
having a fully staffed
IT department at a
fraction of the cost.*

*IntelliSyn works
as an extension of
your organization
so you can
focus on the
needs of your
customers rather
than on your IT
infrastructure.*

- **IntelliSecure** provides tailored, scalable, turnkey managed IT infrastructure security, unified threat management (UTM), and closed-circuit video surveillance services 24 hours a day, seven days a week to protect your network and data.

- **IntelliServer** provides public, private, or hybrid cloud-based hosting and co-location of IT infrastructure and application servers, as well as on-premises server management backed by complete network administration, maintenance, and reporting.

- **IntelliOffice** provides turnkey desktop-to-cloud managed office services, including installation,

ongoing management, maintenance, and support of all hardware, software, and cloud networking elements.

- **IntelliTalk** provides an integrated, full-featured unified communications and collaboration solution for small- and medium-sized businesses (SMBs) and medium to large enterprises. It leverages the most advanced Voice over IP (VoIP) technologies to replace costly phone lines, switches, and cabling and reduce monthly phone costs.
- **IntelliShare** provides a customizable, managed enterprise file sync and share (EFSS) solution that enables secure access to business data from anywhere, supports desktop and server backup, and ensures business continuity with disaster recovery processes.

Leverage Industry Alliances

To ensure you always have access to the most advanced desktop-to-cloud products and solutions, IntelliSyn maintains alliances with industry-

leading suppliers of IT hardware, software, and network security systems and solutions. This allows IntelliSyn to immediately evaluate new technologies as they emerge and make informed recommendations for your infrastructure's future evolution.

Partner With an Experienced Team

IntelliSyn has a proven track record as a customer-oriented IT solutions provider with extensive experience delivering reliable and innovative desktop-to-cloud business communications networks.

Our experienced experts are trained to deal with the IT issues you face every day and any infrastructure emergencies that may arise. And our managed services are a cost-effective alternative to creating and maintaining an in-house IT department.
